

widest-cone geometry:

$D_{\text{sid}}/\Delta_{xy} = 931$, $D_{\text{rec}}/\Delta_{xy} = 766$ voxels

run $L(\zeta) \approx 931/\zeta$ voxels

peak $\hat{g} \approx 770$

$\zeta^* = D_{\text{sid}}/D_{\text{rec}} \approx 1.2$ rows

half-height $\approx 2\zeta^* = 2.4$ rows
